Autoru kolektīvs ir izveidojis mūsdienīgu, plašu monogrāfiju, kas izskaidro zinātniskās rakstīšanas mērķi un būtību, zinātnisko publikāciju veidus, saturu, recenzēšanas procesu, komunikāciju ar zinātniskajiem žurnāliem. Monogrāfija aplūko arī tādus jautājumus kā zinātniskās komunikācijas aspekti, zinātnes komercializācija un pētījumu rezultātu komercializācijas atbalsta struktūras. Jāatzīmē, ka monogrāfijā ir uzsvērtā arī akadēmiskā godīguma nozīme gan informācijas ieguves un apstrādes procesā, gan rakstīšanas un rezultātu izplatīšanas procesā. Ņemot vērā autoru kolektīva apkopoto un sistematizēto plašo materiālu par zinātniskās rakstīšanas prasmju veidošanu un uzlabošanu, to varēs izmantot gan tie, kas raksta savu pirmo zinātnisko publikāciju, gan arī zinātnieki ar pieredzi.

When Kate L. Turabian first put her famous guidelines to paper, she could hardly have imagined the world in which today's students would be conducting research. Yet while the ways in which we research and compose papers may have changed, the fundamentals remain the same: writers need to have a strong research question, construct an evidence-based argument, cite their sources, and structure their work in a logical way. *A Manual for Writers of Research Papers, Theses, and Dissertations*—also known as “Turabian”—remains one of the most popular books for writers because of its timeless focus on achieving these goals.

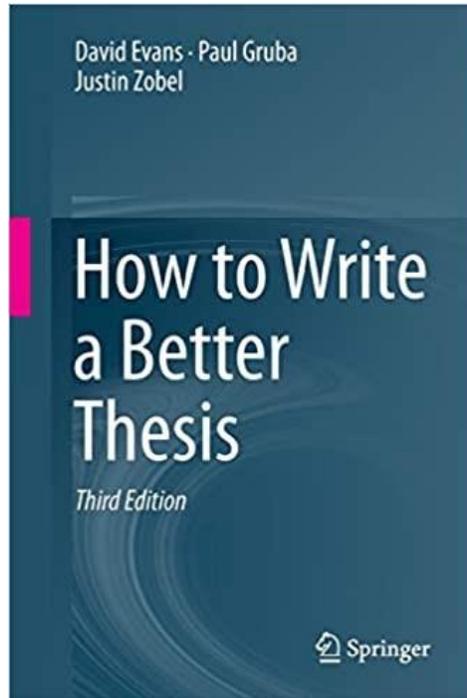

Kate L. Turabian (1893–1987) was the graduate-school dissertation secretary at the University of Chicago from 1930 to 1958.

This second edition of *How to Write and Illustrate a Scientific Paper* will help both first-time writers and more experienced authors, in all biological and medical disciplines, to present their results effectively. Whilst retaining the easy-to-read and well-structured approach of the previous edition, it has been broadened to include comprehensive advice on writing compilation theses for doctoral degrees, and a detailed description of preparing case reports. Illustrations, particularly graphs, are discussed in detail, with poor examples redrawn for comparison. The reader is offered advice on how to present the paper, where and how to submit the manuscript, and finally, how to correct the proofs. Examples of both good and bad writing, selected from actual journal articles, illustrate the author's advice - which has been developed through his extensive teaching experience - in this accessible and informative guide.

By the time Umberto Eco published his best-selling novel *The Name of the Rose*, he was one of Italy's most celebrated intellectuals, a distinguished academic and the author of influential works on semiotics. Some years before that, in 1977, Eco published a little book for his students, *How to Write a Thesis*, in which he offered useful advice on all the steps involved in researching and writing a thesis—from choosing a topic to organizing a work schedule to writing the final draft.

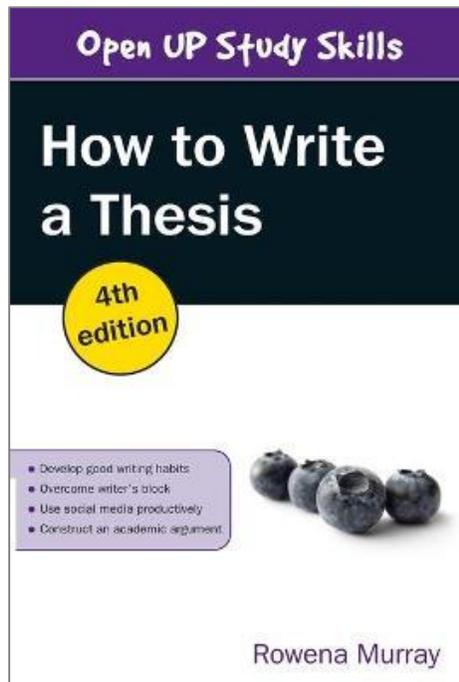

Eco's approach is anything but dry and academic. He not only offers practical advice but also considers larger questions about the value of the thesis-writing exercise. *How to Write a Thesis* is unlike any other writing manual. It reads like a novel. It is opinionated. It is frequently irreverent, sometimes polemical, and often hilarious.
