

**Project title:** European Deans Council for Designing Sustainability Impact Roadmaps

**Number of project implementation agreement:** 2020-1-IT02-KA203-079952

**Registration number:** 4458

**Project completed during the period 01.01.2022. - 30.06.2022.:**

On the 20th and 21st of June, the [DECODE](#) consortium met in Riga, Latvia, for the first in-person meeting. DECODE Erasmus+ project had so far been fully online due to the pandemic, so this was a great opportunity to see each other and exchange after more than a year of working together.

The meeting was hosted by FEEM, leaders of the work on Intellectual Output 3 (IO3) of the project, which is currently being finalized according to schedule and will soon be presented. FEEM work has focused on the development of a self-assessment tool and a toolkit that will help universities to get an image of their current situation in terms of sustainability and some tools to help them move forward and improve.

In the gathering, project members talked about the next steps, which will be to get started with the development of impact pathways and roadmaps to better accompany and implement the improvements suggested by the self-assessment tool in IO3. The partners in charge of this work will be the University of Naples Federico II (UNINA).

The meeting in Riga was a great occasion to update each other on the achievements of the DECODE project so far and on the work that is left to do. At the same time, meeting in person allowed for a more personal exchange to create stronger links among the partners.
