Summer School

All interested parties are kindly invited to present their works and projects and share their experience during the Smart Textiles Gallery

SMART TEXTILES FOR HEALTHCARE

We are pleased to invite you to the Summer School to discover and learn about Smart Textiles for Healthcare through lectures, demonstrator gallery and workshop!

Smart textiles represent an exciting and challenging field of multi-disciplinary research with a vast potential to contribute to improved healthcare. The idea of smart textiles implies that the textile has the ability to interact with the environment and is often supported by electronics that enables textiles to sense, react, and communicate with the user.

WHO to attend?

Students, young researchers, users from different fields and everybody who is interested in discovering new horizons

WHY to attend?

- To discover Smart Textiles for Healthcare
- To improve and share your knowledge
- To know about making of Smart Textiles over the whole value chain
- To generate and implement your own ideas
- To expand your network

The Summer School will consist of three main activities:

DISCOVER

Lectures and the presentation of projects on Smart Textiles for Healthcare

Get introduced to the world of Smart Textiles. Get inspired.

LEARN

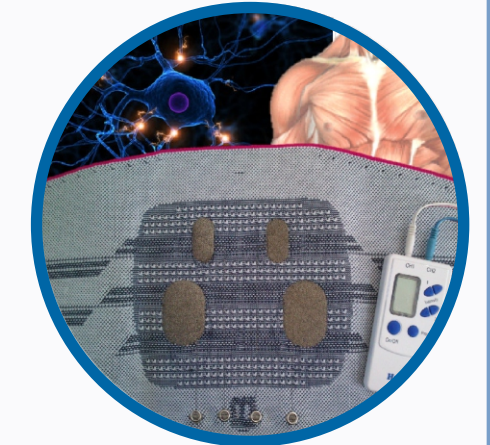

Smart Textiles Gallery and Workshop

- Meet Smart Textiles and share your experience during the Gallery session
- Discover the materials for the making of textile sensors and generate your ideas during the workshop

CONNECT

Workshop and Discussion

- Bring your ideas to life
- Present your results
- Looking for starting points for a project proposal
